# SAFETY DATA SHEET

17 November 2014 / 01 March 2019

### Date of issue/Date of revision Version 1

| Section 1. Identification                  |  |
|--|--|
| Product name                               | : TS-00175   |
| Product code                               | : Tower Elast. Patch Gun (Tex)                                       |
| Other means of identification              | : Caulk, Sealant   |
| Product type                               | : Paste  |
| Relevant identified uses of<br>Product use | Consumer applications, Professional applications.                    |
| Relevant identified uses of                | the substance or mixture and uses advised against                    |
| Use of the substance/<br>mixture           | : Caulking, Sealing  |
| Uses advised against                       | : Not applicable.  |
| Supplier                                   | : Tower Sealants<br>2095 Memorial Park Road<br>Gainesville, GA 30504 |
| Emergency telephone<br>number              | : Chemtrec: 1-800-424-9300   |
| Technical Phone Number                     | : 1-770-535-8782 (8:00 am to 5:00 pm EST)                            |

# Section 2. Hazards identification

| OSHA/HCS status                                | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). |
|--|---|
| Classification of the substance or mixture     | : CARCINOGENICITY - Category 1A   |
|  | Percentage of the mixture consisting of ingredient(s) of unknown toxicity: 72.5%                      |
| <u>GHS label elements</u><br>Hazard pictograms |   |
| Signal word                                    | : Danger  |
| Hazard statements                              | : May cause eye irritation  |
|  | : May cause Cancer  |
|  | : May cause genetic defects   |

: May cause damage to organs through prolonged exposure.

### Precautionary statements

Product name TS-00175

# Section 2. Hazards identification

| : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.   |
|---|
| : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required.  |
| : IF exposed or concerned: Get medical attention.   |
| : Store locked up.  |
| : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| : Sanding and grinding dusts may be harmful if inhaled. This product contains Crystalline Silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. Since this product is not meant to be sanded or sprayed, risk of exposure is |
| considered low. Avoid contact with skin and clothing. Wash thoroughly after handling.<br>Emits toxic fumes when heated.   |
| : None known.   |
|   |

# Section 3. Composition/information on ingredients

| Substance/mixture | : | Mixture           |
|-------------------|---|-------------------|
| Product name      | 1 | Formulation 30050 |

| Ingredient name                                     | %         | CAS number |
|---|-----------|------------|
| Limestone   | 30 - 60   | 1317-65-3  |
| Titanium Dioxide                                    | 0.1 - 1   | 13463-67-7 |
| Acetaldehyde  | 0.1 - 1   | 75-07-0    |
| Crystalline Silica, respirable powder (<10 microns) | 0.1 – 1   | 14808-60-7 |
| Ethylene Glycol                                     | 0.5 - 1.5 | 107-21-1   |

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person. Description of necessary first aid measures

| Eye contact  | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.                            |
|--------------|--|
| Inhalation   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |

Product name TS-00175

# Section 4. First aid measures

Ingestion

: If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

### Most important symptoms/effects. acute and delayed

| Potential acute health eff | ects  |
|----------------------------|---|
| Eye contact                | : Direct contact may cause slight to moderate irritation.   |
| Inhalation                 | : May cause slight irritation to respiratory passages – headache – dizziness.   |
| Skin contact               | . May cause allergic skin reactions and / or central nervous system depression.   |
| Ingestion                  | : No known significant effects or critical hazards. Low ingestion hazard.   |
| Over-exposure signs/syn    | nptoms  |
| Eye contact                | : No specific data.   |
| Inhalation                 | : No specific data.   |
| Skin contact               | : No specific data.   |
| Ingestion                  | : No specific data.   |
| Indication of immediate m  | edical attention and special treatment needed. if necessary   |
| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
| Specific treatments        | : No specific treatment.  |
|                            |   |

Protection of first-aiders
 No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                        |   |
|--|---|
| Suitable extinguishing media               | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media             | : None known.   |
| Specific hazards arising from the chemical | : In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products   | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |

Product name TS-00175

# Section 5. Fire-fighting measures

| Special protective actions                     | : Promptly isolate the scene by removing all persons from the vicinity of the incident if   |
|--|---|
| for fire-fighters                              | there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

# Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|--|
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | ontainment and cleaning up   |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect  |

spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

**United States** 

Page: 4/13

# Section 7. Handling and storage

| Precautions for safe hand | ling ling  |
|---------------------------|--|
| Protective measures       | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Do not get in eyes or on skin or clothing. Do not ingest.<br>Avoid breathing vapor or mist. If during normal use the material presents a respiratory<br>hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the<br>original container or an approved alternative made from a compatible material, kept<br>tightly closed when not in use. Empty containers retain product residue and can be<br>hazardous. Do not reuse container. |

# Section 7. Handling and storage

| Special precautions  | : If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.  |
|--|--|
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Do not store below the following temperature: 5°C (41°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |
|  |  |

# Section 8. Exposure controls/personal protection

### **Control parameters**

### **Occupational exposure limits**

| Ingredient name                                     | Exposure limits                                     |
|---|---|
| Limestone   | OSHA PEL (United States, 2/2013).                   |
|   | TWA: 5 mg/m <sup>3</sup> 8 hours. Form: Respirable  |
|   | fraction  |
|   | TWA: 15 mg/m <sup>3</sup> 8 hours. Form: Total dust |
| Titanium Dioxide                                    | OSHA PEL (United States, 2/2013).                   |
|   | TWA: 15 mg/m <sup>3</sup> 8 hours. Form: Total dust |
|   | ACGIH TLV (United States, 6/2013).                  |
|   | TWA: 10 mg/m <sup>3</sup> 8 hours.                  |
| Acetaldehyde  | ACGIH TLV (United States, 6/2013).                  |
|   | C: 45 mg/m <sup>3</sup>                             |
|   | C: 25 ppm   |
|   | OSHA PEL (United States, 2/2013).                   |
|   | TWA: 360 mg/m <sup>3</sup> 8 hours.                 |
|   | TWA: 200 ppm 8 hours.                               |
|   | ACGIH TLV (United States, 6/2013).                  |
|   | TWA: 0.025 mg/m <sup>3</sup> 8 hours. Form:         |
|   | Respirable  |
|   | OSHA PEL Z3 (United States, 2/2013).                |
| Crystalline Silica, respirable powder (<10 microns) | TWA: 10 MG/M3 / (%SiO2+2) 8 hours. Form:            |
|   | Respirable  |
|   | TWA: 250 MPPCF / (%SiO2+5) 8 hours.                 |
|   | Form: Respirable                                    |
|   | OSHA PEL (United States, 2/2013).                   |
|   | TWA: 5 mg/m <sup>3</sup> 8 hours.                   |
|   | ACGIH TLV (United States, 6/2013).                  |
| Ethylene Glycol                                     | C: 100 mg/m <sup>3</sup> Form: Aerosol              |
|   |   |
|   |   |

Key to abbreviations

# Product name TS-00175

# Section 8. Exposure controls/personal protection

| Α      | = Acceptable Maximum Pe     | ak   | S   | <ul> <li>Potential skin absorption</li> </ul>  |
|--------|-----------------------------|--|---|--|
| ACGIH  | = American Conference of    | Governmental Industrial Hygienists.          | SR  | <ul> <li>Respiratory sensitization</li> </ul>  |
| С      | = Ceiling Limit             |  | SS  | <ul> <li>Skin sensitization</li> </ul>   |
| F      | = Fume                      |  | STEL  | <ul> <li>Short term Exposure limit values</li> </ul>   |
| IPEL   | = Internal Permissible Expo | osure Limit                                  | TD  | = Total dust   |
| OSHA   | = Occupational Safety and   | Health Administration.                       | TLV   | = Threshold Limit Value  |
| R      | = Respirable                |  | TWA   | = Time Weighted Average  |
| Z      | = OSHA 29CFR 1910.1200      | ) Subpart Z - Toxic and Hazardous Substances | ;   |  |
|        | nmended monitoring          | the ventilation or other control mea         | ng may be re-<br>asures and/o<br>should be ma<br>ocuments for | quired to determine the effectiveness of<br>r the necessity to use respiratory<br>ade to appropriate monitoring standards. |
| Approp | riate engineering           | : If user operations generate dust, f        | umes, gas, v  | apor or mist, use process enclosures,  |

| local exhaust ventilation or other engineering controls to keep worker exposure to   |
|--|
| airborne contaminants below any recommended or statutory limits.                     |
| : Emissions from ventilation or work process equipment should be checked to ensure   |
| they comply with the requirements of environmental protection legislation. In some   |
| cases, fume scrubbers, filters or engineering modifications to the process equipment |
|  |

will be necessary to reduce emissions to acceptable levels.

| Individual protection measures |  |
|--------------------------------|--|
| Hygiene measures               | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection            | Safety glasses with side shields.  |
| Hand protection                | Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
| Gloves                         |  |
| Body protection                | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection          | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection         | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.   |

Section 9. Physical and chemical properties

### **Appearance**

| Appearance                                   |   |
|--|---|
| Physical state                               | : Paste                                   |
| Color  | : White                                   |
| Odor   | : Mild Acrylic                            |
| Odor threshold                               | : Not available.                          |
| рН   | : 7.5-8.5                                 |
| Melting point                                | : Not available.                          |
| Boiling point                                | : >37.78°C (>100°F)                       |
| Flash point                                  | : Closed cup: 93.89°C (201°F)             |
| Material supports combustion.                | : Yes.                                    |
| Auto-ignition temperature                    | : Not available.                          |
| <b>Decomposition temperature</b>             | : Not available.                          |
| Flammability (solid, gas)                    | : Not available.                          |
| Lower and upper explosive (flammable) limits | : Not available.                          |
| Evaporation rate                             | : 0.33 (butyl acetate = 1)                |
| Vapor pressure                               | : 2.3 kPa (17.1 mm Hg) [room temperature] |
| Vapor density                                | : Not available.                          |
| Relative density                             | : 1.22                                    |
| Density(lbs / gal)                           | : 10.2                                    |
| Solubility                                   | : Soluble in water                        |
| Partition coefficient: n-<br>octanol/water   | : Not available.                          |
| Viscosity                                    | : 15-40g/s                                |
| Volatility                                   | : TBD                                     |
| Approx % Solid. (w/w)                        | : TBD                                     |
|  |   |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.              |

Product name TS-00175

# Section 10. Stability and reactivity

Hazardous decomposition products

: Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

# Section 11. Toxicological information

### Information on toxicological effects

Acute toxicity

| Product/ingredient name   | Result   |  | S        | pecies          | Dose                | Exposure          |

Crystalline Silica, respirable powder (<10 microns) -

IARC: 1, 2A, 2B, 3, 4 NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen OSHA: + Not listed/not regulated: -

Known to be a human carcinogen.

Product name TS-00175

# Section 11. Toxicological information

### Reproductive toxicity

**Conclusion/Summary** 

: There are no data available on the mixture itself.

### Teratogenicity

**Conclusion/Summary** 

: There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

| Name         | Category   |
|--------------|------------|
| Acetaldehyde | Category 3 |

### Specific target organ toxicity (repeated exposure)

| Name  | Category   |
|---|------------|
| Crystalline Silica, respirable powder (<10 microns) | Category 2 |
| Ethylene Glycol                                     | Category 2 |

### Target organs

: Contains material which may cause damage to the following organs: lungs, upper respiratory tract, skin, eyes.

### **Aspiration hazard**

Not available.

### Information on the likely routes of exposure Potential

### acute health effects

| Eye contact                    | : No known significant effects or critical hazards.   |
|--------------------------------|---|
| Inhalation                     | : No known significant effects or critical hazards.   |
| Skin contact                   | : No known significant effects or critical hazards.   |
| Ingestion                      | : No known significant effects or critical hazards.   |
| Over-exposure signs/sympto     | o <u>ms</u>   |
| Eye contact                    | : No specific data.   |
| Inhalation                     | : No specific data.   |
| Skin contact                   | : No specific data.   |
| Ingestion                      | : No specific data.   |
| Delayed and immediate effect   | s and also chronic effects from short and long term exposure  |
| Conclusion/Summary             | : There are no data available on the mixture itself. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
| Short term exposure            |   |
| Potential immediate effects    | : There are no data available on the mixture itself.  |
| Potential delayed effects      | : There are no data available on the mixture itself.  |
| Long term exposure             |   |
| Potential immediate<br>effects | : There are no data available on the mixture itself.  |
| Potential delayed effects      | : There are no data available on the mixture itself.  |

# Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a

United States Page: 10/13

Product name TS-00175

# Section 13. Disposal considerations

safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
